Restriction/Election

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

I Drawn to a mobile antenna system, among with other things, microstrip antenna elements.

II Drawn to a mobile antenna system, among with other things, feed lines feeding antenna elements from the same row or from neighbouring rows providing about a constant phase difference between them.

III. Drawn to a mobile antenna system, among with other things, electronic components, a low noise amplifier, phase control devices, digital control units and a satellite reading and recognition unit, a separate combiner and a frequency converter.

IV. Drawn to a mobile antenna system, among with other things, a plurality of vertical RF transitions being surface mount coaxial elements formed from surface mount stripline element or from supporting mechanical structures.

V. Drawn to a mobile antenna system, among with other things, electromagnetic shield.

VI. Drawn to a mobile antenna system, among with other things, a cover, a radio transparent part, a belt gear, and a mechanical support.

Art Unit: 2821

2. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristic of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

There is an examination and search burden of these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that a reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and **(ii) an identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to consider timely. Failure to timely traverse the requirement will result in the loss of right to

Art Unit: 2821

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
